Dear Colleagues,

July 1, 2018

Address by the President of the PSWTC by internet via the Nuc. Gang Website. Delivered from the Presidents’ office situated close to the nearest nuclear reactor in the area.

Dear Colleagues,

We are a little bit past the half way point of the year and closing fast to December when we will welcome a new President to this great organization and usher out the current President, me.

Before all of that, we have more to do. What is coming up? Our biggest educational event of the year. Will you be in Las Vegas for our Viva Las Vegas meeting on July 21-22? I hope so. As far as events for Nuclear Medicine Technologists go this is one not to miss. It is totally focused to support you the technologist. There will be CEU’s, time to socialize at our hosted happy hour Saturday night, great food throughout the two days, vendors to visit, and many other activities you may pursue on your own.

Why am I so excited about this meeting? We have a big surprise planned. We are unveiling our own PSWTC logo shirts. We will have two colors to choose from, black, and navy, with multiple sizes to fit everyone. It is a great looking shirt, which you can be proud to wear anywhere and we hope you will wear it everywhere. Everyone will know you belong to the best chapter in the United States when you wear your shirt. Be sure to set aside an extra $20.00 to purchase one. You will be happy you did.

Enough advertisement let us turn our attention to some minute wisdom. What does the word iota have in common with an atom? Ok, time is up. The definition of iota is an infinitesimal amount. An atom is an infinitesimal amount. You could say, there is not an iota of truth in what was said. Alternatively, you can say there is an atom of truth in what was said. Although the atom is small, it still has tremendous ability to cause things to happen. Infact without atoms nothing would happen. It is the same with Nuclear Medicine Technologists. We work quietly behind the scenes but the work we do has a tremendous impact on the overall healthcare of the patients we treat. Be honored you are good enough to be a Nuclear Medicine Technologist. Wear you PSWTC shirt and let everyone know they cannot live without atoms or Nuclear Medicine Technologists. Just a little more advertisement.

Dave
